

NC-RTED: source-disjoint teacher construction and deployed student

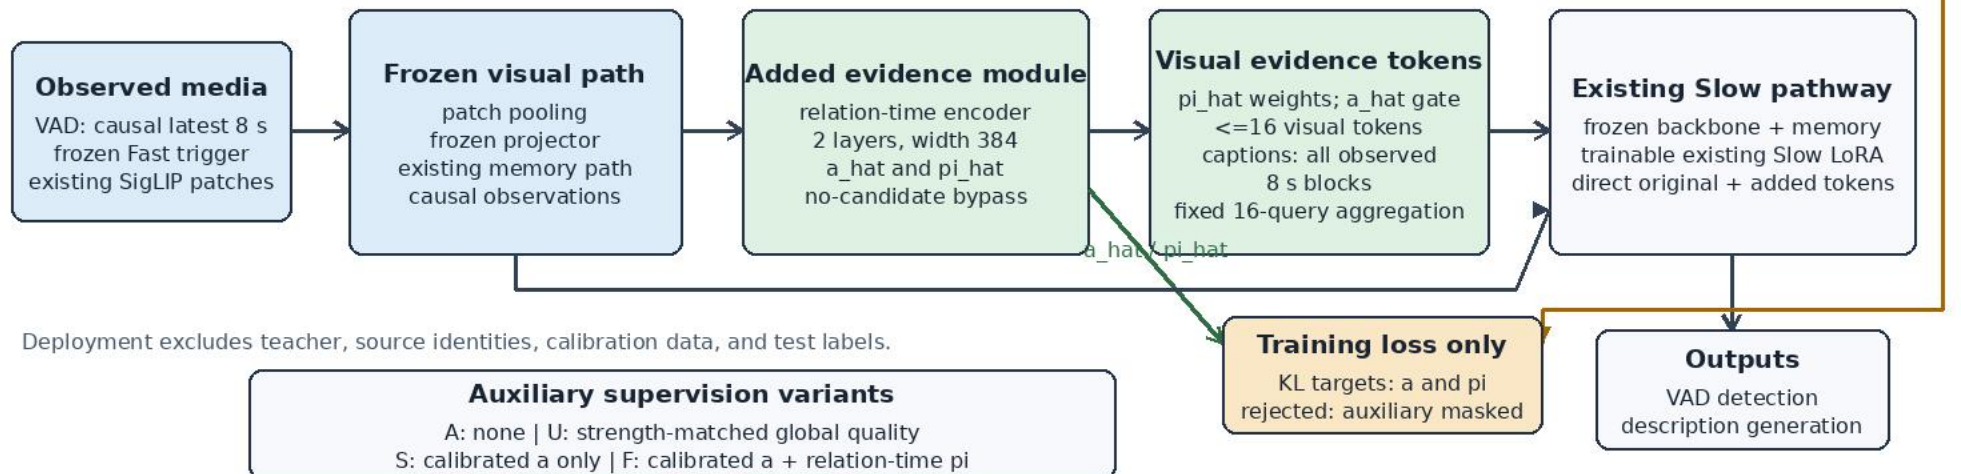

Method schematic only; no experimental results are implied.

Training only: source-disjoint teacher

Teacher reference identities, calibration sources, and labels do not enter the deployed student.
Insufficient reference/calibration support rejects distillation; it is not encoded as normal evidence.

Student training and deployment

Deployment excludes teacher, source identities, calibration data, and test labels.

■ frozen inherited component ■ trainable added module / Slow LoRA ■ training-only teacher material
